### Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Keep unnecessary people away; isolate hazard area and deny entry.

## 6. ACCIDENTAL RELEASE MEASURES

### Personal precautions, protective equipment and emergency procedures

**Personal Precautions** Use personal protective equipment as required. Isolate hazard area. Keep unnecessary and unprotected personnel from entering.

**Environmental Precautions** Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information. See Section 13: DISPOSAL CONSIDERATIONS.

### Methods and material for containment and cleaning up

**Methods for Containment** Prevent further leakage or spillage if safe to do so.

**Methods for Clean-Up** Soak up with inert absorbent material. Pick up and transfer to properly labeled containers.

## 7. HANDLING AND STORAGE

### Precautions for safe handling

**Advice on Safe Handling** Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Wear personal protective equipment. Wash face, hands, and any exposed skin thoroughly after handling. Avoid breathing vapors. Use only with adequate ventilation. Do not eat, drink or smoke when using this product.

### Conditions for safe storage, including any incompatibilities

**Storage Conditions** Keep container tightly closed and store in a cool, dry and well-ventilated place. Store locked up. Protect from direct sunlight. Store away from incompatible materials. Keep in properly labeled containers. Store containers upright. Keep separate from food items.

**Packaging Materials** Do not reuse container. Empty containers retain product residue and can be hazardous.

**Incompatible Materials** Strong acids. Strong oxidizing agents. Sodium hydroxide. Aliphatic amines.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Exposure Guidelines**

The following information is given as general guidance

**Appropriate engineering controls**

**Engineering Controls**

Ensure adequate ventilation, especially in confined areas. Eyewash stations. Showers.

**Individual protection measures, such as personal protective equipment**

**Eye/Face Protection**

Wear approved safety goggles where a splash hazard exists.

**Skin and Body Protection**

Butyl rubber or nitrile rubber gloves. Wear suitable protective clothing.

**Respiratory Protection**

Ensure adequate ventilation, especially in confined areas. In case of inadequate ventilation wear respiratory protection.

**General Hygiene Considerations**

Handle in accordance with good industrial hygiene and safety practice. Wash face, hands and any exposed skin thoroughly after handling.

**10. STABILITY AND REACTIVITY**

**Reactivity**

Not reactive under normal conditions.

**Chemical Stability**

Stable under recommended storage conditions.

**Possibility of Hazardous Reactions**

None under normal processing.

**Hazardous Polymerization**

Hazardous polymerization may occur under certain conditions of storage or use. Avoid strong oxidizers such as caustic soda (sodium hydroxide) which can induce vigorous polymerization at temperatures around 390°F

Polymerizes exothermically with amines, mercaptans and Lewis acids at ambient temperature and above. Reacts with considerable heat release with some curing agents. Run-a-way cure reactions may char and decompose the resin system, generating unidentified fumes and vapors, which may be toxic. Heating this material over 300°F in the presence of air may cause slow oxidative decomposition; above 500°F polymerization may occur. Some combinations of resins and curing agents can produce exothermic reactions, which in large masses can cause runaway polymerization and charring of the reactants.

**Conditions to Avoid**

See Sec. 7 Handling & Storage.

**Incompatible Materials**

Strong acids. Strong oxidizing agents. Sodium hydroxide. Aliphatic amines.

**Hazardous Decomposition Products**

Carbon monoxide during a fire. Burning produces irritating and toxic fumes.
